

**High-quality production  
of body bags**

**Polcreative**

Polcreative Group offers a wide selection of body bags and accessories that fit the needs of your funeral home, hospital, business or international organisation. Our products are available in different models but can also be custom-made.

# About Polcreative Group

---

After a long career in the funeral industry, Herman van Loon founded Polcreative in 2010: "In a modest 350 m<sup>2</sup> hall and with 8 members, we started producing body bags, specially designed for hospitals, funeral homes and international aid organisations. In 2012, the daughter, Heidi van Loon, joined the company.

By 2016, the company had already grown considerably. Therefore, Polcreative expanded its manufacturing operations and occupied a production area of up to 1,000 m<sup>2</sup>. In 2020 Heidi took over the company and changed the name to Polcreative Group. In 2023 we bought a new ground to extend our production and warehouse.

With more than a decade of experience, we have since built an excellent reputation in the funeral industry. With more than 30 employees and a working area of more than 1000 m<sup>2</sup>, we have become one of the leading companies for body bags across Europe.

## Why choosing us?

**High quality:** As a major European manufacturer, we only work with the best international suppliers and materials.

**Tailor-made:** Each body bag can be fully customised to your specific requirements.

**Large stocks and fast deliveries:** Our large stocks of body bags are available in both big and small quantities. You can be sure of a wide range and efficient logistics.

**Eco- friendly:** We do our best to always find environmentally friendly and sustainable solutions at every stage of production and distribution.

## Standard Body Bags

Our standard body bags are made from PE foil and supplemented with specific additives to mimic biodegradation, causing a fragmentation of the materials.

This type of body bag is used mainly by hospitals and funeral homes, with the help of a stretcher.

It is possible to add extras, such as tie ribs, document pouch and absorbent layer.

## Biodegradable Body Bags

Biodegradable means that there is a biological decomposition of the material into CO<sub>2</sub>, water and minerals. The material will disintegrate within 12 weeks and must be at least 90 % biodegraded within 6 months, following the norm EN 13432 in soil.

This type of body bag is used mainly by hospitals and funeral homes, with the help of a stretcher.

It is possible to add tie ribs.

## Biohazard Body Bags

This is a Heavy-Duty body bag with an extra layer of transparent foil inside, which allows body identification without risk of exposure.

Not oxo-degradable or biodegradable, used for epidemics and infectious diseases.

They are mainly used by international organisations.

They have handles and are available in black and white. It is possible to add extras, such as tie ribs, document pouch and absorbent layer.

Width 100cm White U-shape zip	Width 110cm White U-shape zip	Width 120cm Black U-shape zip

° Tie ribs included

## Heavy-Duty Body Bags

Our Heavy-Duty body bags are made of enforced co-extrusion PEVA, not biodegradable.

They are mainly used by international organisations, involved in war conditions, disasters and infectious diseases.

They have handles and are available in white and black. It is possible to add extras, such as tie ribs, document pouch and absorbent layer.

# Small Body Bags

Our small body bags can be used for pets, as well as body parts.

**Standard:** They are made of PE foil. Available in beige, with a straight zip.

**Premium:** Made of blue velour or artificial leather (customer choice) and PE foil inside. They have handles and can be used to carry a small body bag without handles.

Standard	Premium 2 handles	Premium 4 handles
5301 60cmx60cmx130µ	5213 60cmx30cm	5233 100cmx50cm
5302 60cmx90cmx130µ	5223 80cmx40cm	5503 90cmx120cm
5303 9cmx120cm x130µ	5501 60cmx60cm	5504 90cmx160cm
5304 90cmx160cmx130µ	5502 60cmx90cm	

# Accessories

You can come to us not only for our body bags, but also for accessories such as stretchers, absorbents (fibre and layer), protective sets, mattress cover and information tags.

**Stretcher:** Suitable for transporting our body bags without handles efficiently. It can be used together with our absorbent layer, which will allow you to re-use the stretcher. It can transport up to 200kg.

**Absorbents:** The superabsorbent fibre and the absorbent layer are essential to absorb fluids and prevent moisture build-up on a deceased.

**Protective Sets:** They offer optimal protection during post-mortem activities, as well as in emergency situations, such as epidemics, where safety is crucial.

**Mattress Cover:** Used for infectious diseases and epidemics, to safely cover the mattresses. It can be washed.

**Information Tags:** They can be tied to our body bags or inserted individually in a document pouch. They are available in groups of 2 and 4 tags and the information on them can be customised.

<b>Stretcher Brown</b> 6001 200cmx75cm 10 straps	<b>Stretcher Khaki</b> 6101 200cmx75cm 10 straps	<b>Superabsorbent Fibre</b> 4502 8 grams Absorption 0,5l	<b>Absorbent Layer</b> 150cmx70cm Absorption 5l	<b>Mattress cover Straight zip</b> 2403 220cmx90cm
